## ACHIEVEMENTS

#CGPBoleh campaign (08/2020 - 10/2020)

Learning Infrastructure modernization, Application Development, ML & Data Analytics on Google Cloud Platform

## PERSONAL PROJECTS

Memo Application for Android using Flutter (04/2022 - 05/2022)

- A project for learning the Flutter framework. It is a simple Android application that allows the user to save and display the text memo in an organized way. Users can create, edit, view, and delete the memo.

Discord Bot (05/2022 - 05/2022)

- A simple discord bot to inform the members in a voice channel when a member joins or leave the channel. The bot utilizes text-to-speech technology to speak the member's name and the status of entering or leaving the room.

Final Year Project - SubGen (05/2022 - 02/2023)

- A desktop application that generates multi languages subtitles in real-time. Microsoft's Azure speech-to-text and translation services are integrated into the application to provide speech recognition and translation in real-time.

Portfolio Website (03/2023 - 04/2023)

- A responsive and clean website for self-introduction. The website is built with React and Framer Motion library to deliver a smooth user experience.
